Basic Data (excerpted from primary sources):

The 1916 SEBR indicates that John Gavin leased this mine and that is was "doing a small amount of work underground. This is not being done in a permanent manner." The 1916 SEBR also indicates that coal at this mine "outcrops on the side of the coulee," and that when; the mine was inspected on 23 January 1916 the mine was "found to be in a bad condition." No listings were noted for this mine following those noted in the 1916 SEBR, and it seems likely that the mine was not operated following that time.

Descriptive information pertaining to this mine is included in:
